

Autogas Day In Annapolis

Join autogas industry
leaders in Annapolis!

Tuesday, March 14th

The Clean Energy Choices Coalition is planning a day of advocacy in Annapolis to educate Maryland legislators on the importance of clean energy choices and the role propane autogas school buses play in helping the state and local jurisdictions meet their carbon reduction goals. Autogas is cost effective and operationally sensible!

Last year, the Maryland legislature passed the “Climate Solutions Now Act” that mandated the purchase of all electric school buses after 2024. We believe this was a mistake and that change is needed to recognize propane powered buses as solid alternatives to an all-electric fleet. The Clean Energy Choices Coalition will be setting up a propane powered school bus in front of Lawyer’s Mall in Annapolis to showcase the advantages of a propane powered bus fleet. We are encouraging all interested coalition members to show up in support to serve coffee and donuts from the bus to legislators as they make their way to the state house for the start of their daily session. The school bus showcase will be followed by individual meetings with select legislators where coalition partners can speak directly on the benefits of autogas and how this solution was too easily overlooked in Annapolis.

AGENDA

8:30 – 10:30am School Bus Showcase & Coffee with Legislators

Lawyer’s Mall – Outside the state house
Annapolis, MD 21401

**This will be an outdoors event, so dress accordingly.*

10:30am – 1:00pm Coalition Member Meetings with select legislators

Coalition members will be paired up with selected legislators.

For more information or if you are interested in attending, please contact Jessica Johnson at info@cleanenergychoices.org.
